CITIES OF BŒOTIA, IN SILVER. *(Continued).*

Thebes; *Mionnet, Supp.* pl. 17, fig. 2, but the buckler ornamented with bars on the flat edge; *fine condition:*
size 4. *weight* 193 *grs.*

Another; but the buckler without bars; *middling condition:*

Thebes; ΘE., type of *Mt. Supp.* pl. 16, fig. 2, in an indented square, with a bunch of grapes in the field, to the left of the vase; *good condition:* *size* 5. 5

1496 Thespiæ; ΘΕΣΠΙΚΟΝ., *Mt. Supp.* pl. 17, fig. 7; *slightly rubbed on the hair, but in very excellent condition:*

size 6. *weight* $181\frac{7}{10}$ *grs.* 1

*** This is one of the most rare coins in the whole Greek series.

1497 Uncertain of Bœotia; *obv.* Buckler; *rev.* a Diota in an indented square. For the precise form of this Diota, see the cup, fig. 1, pl. 14, vol. 3, *Mionnet, Supp.;* or rather the reverse of fig. 10, pl. 4, *Cadalvene Réc. de Méd. Grècques.* Above the diota is a leaf of laurel, and on each side of the foot is a letter, probably either AA? or ΛA? but difficult to decide without the removal of a thin coat of black oxide, in consequence of the die having broken during the striking; *extremely well preserved, old style of work, and a very curious unique coin:*

size 5. *weight* $180\frac{9}{10}$ *grs.* 1

*** It is possible the letters might be AN.? see Anthedon, Mus. Ainsl. p. 173; Sestini, Descrip. Num. Vet., *Lipsiæ*, 1796.

GOLD DIDRACHMS OR STATERS OF ATHENS.

1498 Athens; *Mionnet*, p. 111, No. 1; see *Hunter*, tab. 8, fig. 6; *most perfect condition, and the degree of rarity too well known to require comment:*

size 4. *weight* $132\frac{8}{10}$ *grs.* 1

1499 Another; exactly the same type in every respect, but from a different die; *precisely the same style of work, and the same perfect condition:* *size* 4. *weight* $132\frac{7}{10}$ *grs.* 1

*** These two coins may be safely regarded as of undoubted authenticity. So much doubt and mistrust as to the existence of genuine gold coins of Athens has been caused by the statements of Eckhel and others, in print, as well as by the works of modern falsifiers, that this remark may, perhaps, be useful to distant collectors. It is now admitted that the learned Eckhel, when speaking of gold staters, in his Doct. Num. Vet. (Prolegomena Generalia, vol. 1, p. XLI.), was in error in doubting the existence either of the *stater aureus* of Athens, or of those of Phocæa and Cyzicus; as well as in saying, at page 206, vol. 2, when speaking of the gold coins of Athens: "*Hujus metalli numum nullum habemus certum.*" It is rather singular that he did not adopt means to verify the fact, for he was well aware of the existence of the gold coin of Athens in the Hunter cabinet, when he wrote; and, also, that good authorities hold opinions contrary to his own, as to the staters of Phocæa and Cyzicus.

CITIES OF ATTICA, IN SILVER.

SILVER DECADRACHM (OR MEDALLION) OF ATHENS.

1500 Athens; *obv.* Head of Minerva, to the right, with Helmet as on the Tetradrachms; *rev.* AΘE. (retrograde) an Owl standing, seen in front, with wings extended, in an indented square; in the upper angle of which was a sprig of olive, (two leaves and a berry) only a small portion of which is visible on the coin; *in perfect condition, the die slightly flawed, and of a rather rude archaic style of work:*

size $9\frac{1}{4}$. *weight* 664 *grs.* 1

*** This coin gives, therefore, an Attic drachm of $66\frac{4}{10}$ grains, and is the second hitherto discovered. The other (from the cabinet of Mr. Burgon) is in the British Museum. This coin is the identical specimen engraved in the Voyages dans la Grèce, 2nde Livraison, by the late Chevalier Brönsted, *Paris*, 1830, folio, p. 188 and p. 300. It is there noticed as an octodrachm, but the weight is decisive as to its being a decadrachm. Not only was this denomination of Athenian money unknown till of late years, but its name (δεκάδραχμον) has hitherto eluded the vigilance of the lexicographers. It will be found to occur, however, in the treatise, commonly called the Second Book of the Œconomics of Aristotle: Τοῦ δε σίτου πωλουμένου ἐν τῇ Χώρᾳ ΔΕΚΑΔΡΑΧΜΟΥ, κ. τ. λ. (Œc. § XXXIV.) In explanation of this circumstance, it is needful to observe that the passage exhibits a different reading in *all* the early editions of Aristotle. Even down to that printed at Oxford, in 1810, we read δέκα δραχμῶν. The genuine text (as far as the writer is aware) was first restored in the very careful edition of the Politics and Œconomics, published by Goettling, in 1830; and that, too, strange to say, on the authority of *all the four MSS.* which the learned editor collated for his work. Thus, while a very important coin has been added to Greek Numismatology, a lost word has also been restored to Greek nomenclature.

N.B. The celebrity of this coin appears to have induced some forger to make a false die. An impression from which having been found in a drawer of one of the cabinets, it has been thought proper to allow it to accompany the true coin with the same feeling with which, it may be presumed, its late proprietor kept it.

1501 Athens; *obv.* Minerva; *rev.* AΘE., Owl, in an indented square; compare *Combe Brit. Mus.* tab. 6, fig. 10; *one of the earliest or primitive tetradrachms, in very good condition:* *size* $5\frac{1}{2}$. *weight* $261\frac{5}{10}$ *grs.*

*** The eye of Minerva is large and round, like that of a horse. These primitive tetradrachms of this renowned city, may be safely referred to a period between 600 B.C. and 700 B.C.

Another; but more recent style; *Hunter*, tab. 8, fig. 7; *Mionnet*, pl. 54, fig. 1; *a fine specimen of the common coin of this celebrated people, probably anterior to the period of Pericles: size* 6. *weight* 262$\frac{1}{10}$ *grs.*

Athens; Drachm, Hemidrachm, two Oboli, and two Hemioboli; *all in fair condition:* . 8

1502 Athens; eight coins; a similar lot, *but the primitive tetradrachm somewhat different from the preceding, and of very curious style and design, the eye of Minerva large and round like that of a horse:*

size 5. *weight* 264$\frac{5}{10}$ *grs.* 8

*** In this lot also, the tetradrachm, of more recent style, is a fine specimen of the common coinage of Athens, probably anterior to the period of Pericles, and weighs 265$\frac{8}{10}$ grains.

1503 Athens; a primitive Tetradrachm, still different from either of the two preceding; the eye better managed, but yet the letters A⊕E. are retrograde; *rubbed, but in fair preservation, and rare: size* 6. *weight* 251 *grs.*

Athens; Another, more recent style: *size* 6.

*** This coin weighs only 233$\frac{6}{10}$ grains, which shews it to be an ancient forgery. Such falsifications very seldom occur. It is well known that the silver coinage of Athens was celebrated in Antiquity for its purity and integrity.

Athens; a Drachm; type of *Hunter*, tab. 10, fig. 12; AΘE. MIKI. ΘEOΦPA.; in the field, a quadriga at full speed to the right; on the vase, M.; *fine condition, and rare:*

size 4$\frac{1}{2}$. *weight* 58$\frac{6}{10}$ *grs.* 3

*** This is the only drachm of Athens of this type in the collection. The rarity of this type and size escapes notice. It is worth remarking, that as this coin is of precisely the same age as the following tetradrachm (having the same magistrates' names), and shews no signs of having lost much in weight, it is very singular that it should be so light. The weight of the following tetradrachm would give a drachm of 64$\frac{9}{10}$ grains.

CITIES OF MESSENIA, LACONIA, ARGOLIS, AND ARCADIA, IN SILVER.

1616 Messenia; *obv.* compare *Mionnet, Supp.* pl. 6, obverse of the coin of Pheneus, fig. 5, but on this coin the ear of wheat is beautifully defined in front of the hair; *rev.* ΜΕΣΣΑΝΙΩΝ. disposed around the figure of Jupiter Ithomates, which is in the same attitude as on the coin *Mt. Supp.* pl. 6, fig. 2; *in perfect condition, and the style of work extremely beautiful:*

size $5\frac{1}{2}$. *weight* $188\frac{3}{10}$ *grs.* 1

*** This coin, as to age and style of work, is probably unique. Its age may be referred to precisely the same period as the coins of Arcadia and Pheneus, engraved in Mionnet, Supp. pl. 6, fig. 4 and 5; being anterior to the highly interesting coin of Messenia, published by Millingen, *Cities and Kings, pl. 4, fig. 20*; from the collection of W. R. Hamilton, Esq., with the epithet, ΙΘΩΜ, in conjunction with a representation of the same Jupiter. It is only by means of the last mentioned important coin with the epithet, that the type of the coin above described can be, with certainty, referred to Jupiter Ithomates, and a correct notion formed of the style and attitude of the statue. See Pausanias Messenics, beginning of Chap. 33.

1617 Messenia; see *Mt. Supp.* pl. 73, fig. 4; *in extremely fine condition:* . . *size* $3\frac{1}{4}$.

Argos; *obv.* Head of Juno, wearing an elevated crown with honeysuckle ornaments, to the left; *rev.* AP[ΓΕΙΩΝ.], Diomedes, to the right, carrying off the palladium; behind him, in the field, is a swan, with wings raised; *very fine work, not well struck, and a little rubbed, but on the whole in very fair condition, considering the extreme rarity of the coin:* . . *size* 4. 3

*** This coin, according to Mionnet, appears not to exist in the French collection.

Sparkes 1618 Another; but the Head of Juno to the right, and Σ.? behind the head; *rev.* ΑΡΓΕΙΩΝ., naked figure of Diomedes,

with the chlamys flowing behind him, &c. as in the preceding coin, but nothing in the field; *most beautiful work, perfect condition, and of the utmost rarity:*

size $4\frac{3}{4}$. *weight* $83\frac{3}{10}$ *grs.* 1 £12 —

1619 Argos; type of *Mt. Supp.* pl. 7, fig. 6; *obv.* Head of Juno; *rev.* ΑΡΓΕΙΩΝ ⋮ Ε. (sic.) two Dolphins placed contrariwise; between them, a pomegranate on the stalk, with two leaves; *extremely rare, and in very excellent condition:*

size $6\frac{1}{4}$. *weight* $186\frac{3}{10}$ *grs.* 1

1620 Another; with a Wolf's Head between two Dolphins; *extremely rare, and in very good condition:*

size $6\frac{1}{4}$. *weight* $188\frac{5}{10}$ *grs.* 1

*** This is the identical coin published by Millingen, Cities and Kings, tab. 4, fig. 19.

1621 Argos; *obv.* Half Wolf to the left; *rev.* A., and two oblong deep indentations; *old work, very fine:*

size $2\frac{1}{2}$. *weight* $47\frac{1}{10}$ *grs.*

Argos; *obv.* Half Wolf to the left; *rev.* A., and a small Vase, with ΦΙΛΟΚΛΗΣ. in an indented square; *extremely fine:* *size* 3. *weight* $35\frac{1}{10}$ *grs.*

Argos; Θ., Wolf to the left; *rev.* [Π]Υ., Helmet to the left, ornamented with a wreath of laurel; *rare, and well preserved:* *size* $1\frac{1}{4}$. *weight* $17\frac{5}{10}$ *grs.*

Heræa, in Arcadia; *obv.* veiled Head of Juno to the left; *rev.* ΕΡ. in a square, archaic style; *very rare, and in perfect condition:* *size* $2\frac{1}{2}$. *weight* $48\frac{4}{10}$ *grs.*

*** These coins are of recent discovery. The style of work, and the forms of the letters, as well as the style of mintage, entitle them to rank among the most early coins of the Peloponnesus.

Megalopolis, in Arcadia; *obv.* Jupiter; *rev.* ΜΕΓ., Pan seated; *well preserved:* *size* 3. *weight* 36 *grs.* 5

*** This fine coin is erroneously appreciated by Mionnet.

1627 Cnossus ; *Mt.* p. 268, No. 75 ; *rather coarse work, but in perfect condition :* *size* 8. *weight* $257\frac{4}{10}$ *grs.*

*** There is a variation in the position of the female on the obverse of this coin, which renders it remarkable.

Hierapytna; *rev.* ΙΕΡΑΠ. ΝΕΩΝ. (sic.) *Mt.* p. 284, No. 209, but the type of the reverse is in a wreath of laurel; *very rare, and very well preserved: size* 4. *wt.* $55\frac{8}{10}$ *grs.* 2

1633 Gortyna; for type compare lot 1631, but this coin has had a retrograde legend, of which the letters NY. only remain owing to wearing of the die; *nearly perfect condition, but the die worn on both sides:* *size* 8. *wt.* $181\frac{2}{10}$ *grs.*

Itanus; see *Mt. Supp.* pl. 10, fig. 3; *fine condition, and rare:* *size* $3\frac{3}{4}$. *weight* $83\frac{6}{10}$ *grs.*

(retrograde), a Bull to the left standing, with its legs tied, and one of them lifted up; its head approaches the ground as if drinking. The bull is standing on an uncertain object, indicated by an exergue line, from which proceed (at right angles) a series of short lines placed close to each other, and extending to the edge of the die; *rather rubbed, but in satisfactory condition, and of great rarity with this very remarkable inscription; the style of work is old, and extremely good:*

size $6\frac{1}{2}$. *weight* $179\frac{7}{10}$ *grs.*

*** This coin is very curious, inasmuch as it appears not only to correct the reading of that in the French cabinet, Mt. p. 290, No. 248, and

Pell. Réc., tab. 101, fig. 62; but (if we may trust the plate) seems to have been struck from the identical dies, which produced Nos. 62 and 63 of Pell. tab. 101; the obverse being identical with that of fig. 63, and the reverse of fig. 62. It might be supposed, that the uncertain representation on which the bull stands was the remains of an older type, and the coin restruck; but a careful examination of the coin seems to render such an admission very difficult. It remains, therefore, to be explained, especially by other coins of the same type.

Phalasarna; *Pell. Réc.* pl. 101, fig. 66; *Mt.* p. 291, No. 263; *extremely rare and in very good condition:*
size 5. *weight* $83\frac{4}{10}$ *grs.* 2

(year 272); a Female Figure standing to the left, with two ears of corn in her right hand, held downwards, and a long sceptre in the left; *dubious:* . *size* 10. 14

*** This coin, *though dubious*, is certainly cast upon an original, and is remarkable as affording the opportunity of recording a type and date; presumed to be unpublished.

KINGS OF PONTUS AND THE CIMMERIAN BOSPHORUS, IN GOLD.

1649 Mithradates VI. Eupator; ΒΑΣΙΛΕΩΣ. ΜΙΘΡΑΔΑΤΟΥ. ΕΥΠΑΤΟΡΟΣ.; *Mt.* p. 360, type of No. 6; in the field, to the left of the stag, is a crescent and star; to the right, Δ. and the monogram No. 718, *Mt.* pl. IX.; under the inscription, the monogram No. 717, *Mt.* pl. IX.; *the rarity of this beautiful coin needs no comment; the preservation is perfect, and the portrait extremely fine:*

size 5. *weight* $130\frac{1}{10}$ *grs.* 1

*** This coin, therefore, combines the monograms on both No. 6 and No. 7, page 360 of Mionnet.

1650 Another; but instead of the Δ. and monogram No. 718, there is the date ΘΣ. (209) and the letters XA. or AX. in monogram; see *Mt. Supp.* p. 466, No. 8, and *Dumersan, Cab. Allier*, pl. 8, fig. 7; *in most excellent condition, but has been in circulation: size* 5. *weight* 127 *grs.* 1

*** This coin, having a date, is even more rare than the preceding.

TETRADRACHMS OF MITHRADATES VI. IN SILVER.

*** Of these rare coins, according to Mionnet, the French Cabinet only possesses ten. Their dates do not range later than on the following coins, namely, from the years 208 to 225, both inclusive.

1651 Mithradates VI. Eupator; ΒΑΣΙΛΕΩΣ. ΜΙΘΡΑΔΑΤΟΥ. ΕΥΠΑΤΟΡΟΣ.; type of *Mionnet*, pl. 74, fig. 7; see *Combe, Brit. Mus.* tab. 9, fig. 5; date ΒΚΣ. (222); a monogram on each side the stag, and under the inscription is ⊖; *of extreme rarity, in most perfect condition, and a very beautiful and clean coin: size* $9\frac{1}{2}$. *weight* 259 *grs.* 1

1652 Another; with a monogram on each side the stag, and Δ. under the inscription; date ΓΚΣ. (223); *of the same rarity, beauty, and perfect condition as the preceding: size* $9\frac{1}{4}$. *weight* $257\frac{5}{10}$ *grs.* 1

1653 Another; with one monogram to the left of the stag, and the date ΕΚΣ. (225) to the right; under the inscription Α.; *of the same rarity and beauty, and in perfect condition: size* $8\frac{3}{4}$. *weight* 260 *grs.* 1

1654 Another; with the date ΔΙΣ. (214), and a monogram behind the stag, and ⊖ under the inscription; *a fine well preserved coin, but slightly rubbed on the prominent parts of the hair: size* 9. *weight* $258\frac{8}{10}$ *grs.* 1

1655 Another; with two monograms behind the stag, and the date ΔΚΣ. (224) in front of it, under the star and crescent; under the inscription Γ.; *well preserved, and a fine coin, although it has been in circulation, and is consequently somewhat rubbed: size* $9\frac{1}{4}$. *weight* $251\frac{7}{10}$ *grs.* 1

1656 Another; with Δ. and a monogram behind the stag, and the star and crescent before it, but no date; *a fine well preserved coin, but it appears to have been in circulation: size* $9\frac{1}{4}$. *weight* $239\frac{5}{10}$ *grs.* 1

*** How far the absence of a date on this fine coin, and its defective weight, may be supposed to invalidate its claim to authenticity, is left to individual opinion.

*** *The following have a Pegasus on the reverse.*

1657 Mithradates VI. Eupator; having a Pegasus on the reverse instead of the stag; see *Mionnet, Supp.* p. 467, No. 13; date HΣ. (208); *injured by black oxide on the obverse, but in fair condition: size* $8\frac{1}{2}$. *weight* $225\frac{4}{10}$ *grs.* 1

*** This type, with the pegasus, is much more rare than the preceding. According to Mionnet there are but three in the French collection.

1658 Another; *Mt. Supp.* p. 467, No. 11, with the date EΣ. (205), and $\frac{\Omega}{N}$ behind the pegasus; *somewhat rubbed, but in good condition: size* 9. *weight* $257\frac{7}{10}$ *grs.*

*** The authenticity of this coin appears to be dubious.

Another; but with the type of the Stag on the reverse, and with date ΘIΣ. (219); see *Mt.* p. 361, No. 13; *false: size* $8\frac{1}{4}$. *weight* $268\frac{6}{10}$ *grs.* 2

KINGS OF THE BOSPHORUS, IN GOLD & ELECTRUM.

*** This class of coins is so well known to be uniformly of such extreme rarity, that it has not been thought needful to advert to the particular degree of scarcity of each coin. The references to Mionnet will be found sufficient. Sestini, in his Lettere e Dissertazioni Numismatiche, vol. 1, p. 32, boasts of twenty-two of gold and electrum, seven in silver, and eleven in copper, in the rich Ainslie collection, and adds, that such coins "fanno sempre il pregio, e la rarità dei gabinetti." The French Cabinet possesses about forty-five, of which twenty-five, according to the testimony of Sestini, belonged to Pellerin.

(Coins of Kings of the Bosphorus, in Gold, continued at p. 256.)

GOLD STATERS OF CYZICUS, USUALLY CALLED DISTATERS, OR DOUBLE STATERS.

*** It is now admitted that the learned Eckhel, (Doct. Num. Vet. vol. 2, page 451,) speaking of the silver staters of Cyzicus, and quoting Suidas, (in Κυζικηνοι στατηρες) was in error in adding, "pari fama fuerunt stateres Cyziceni aurei, sed verisimiliter imaginarii tantum; de quibus actum alibi." (proleg. gen. cap. ix. p. xli.) The young Collector may therefore feel assured that these coins are specimens of the Κυζικηνοι of which Xenophon (book v.) promised his soldiers one to each man per month. That they are Staters, and not Distaters, may be proved as follows:—Demosthenes (*in phorm.*) speaks of the same coin, and identifies it to us, by informing us that its current value was reckoned at twenty-eight Attic Drachmæ. We learn from various other sources, that the *stater aureus* of Athens, as well as that of Philip, and of Alexander, &c. &c. (weighing 133 grains troy) passed current at twenty Attic Drachmæ, and we know them to be of pure gold. The cyzicene stater is of pale gold, or electrum, and weighs about 248 grains troy. This pale gold or electrum is about 18 carats fine, *i. e.* consists of about one-fourth part of silver and three-fourths pure gold. If, therefore, from 248 grains we deduct the weight of the fourth part (of silver) we obtain 186 grains of pure gold in the Cyzicene stater, and we shall then find that if 133 grains of pure gold be worth 20 Attic Drachmæ, 186 grains will be worth 28 Attic Drachmæ, shewing that the ancients estimated the value of these coins very accurately. There seems to be no need of taking the value of the silver (62 grains) into account, as the expence of extracting it, or separating it from the gold, would probably (in ancient times) have absorbed its value.

1774 Cyzicus; *obv.* draped and winged Female Figure in motion, to the left, with her head turned back, and holding up a *pelamis*, or tunny fish in her extended right hand; her hair hangs down in long straight dotted tresses, and is ornamented in front of the head like that of Diana; *rev.* quad. incus.; *in most archaic style, and in extremely fine condition:* *size* $4\frac{1}{2}$. *weight* $247\frac{9}{10}$ *grs.* 1

*** The general rarity of all these coins is so well known, that it does not

appear needful to discuss the particular rarity of each. Many will be found to be unpublished, and several are presumed to be unique. To the latter important class, the above described coin, and several of the following, will be perceived to belong. Also, it may be here remarked, that so little is known of the Mythology connected with the city of Cyzicus, or of the local traditions anterior to the period to which these very interesting coins belong, that no attempt is here made to assign names to the representations which are found upon them. These are each worthy of separate dissertations, after due study and research.

1895 Another; EKΦ. (526); see *Mionnet, Supp.* p. 531, No. 249; *extremely good condition:* *very pale EL. size* 4. *weight* $111\frac{3}{10}$ *grs.* 1

*** This is the identical coin described by Mionnet, from the Allier cabinet; see Dumersan, pl. 10, fig. 8.

1896 Another; CKΦ. (526); see *Mt. Supp.* p. 531, No. 250; *in very good condition:* *very pale EL. size* $4\frac{1}{4}$. *weight* $117\frac{2}{10}$ *grs.* 1

1897 Another; ZKΦ. (527); see *Mt. Supp.* p. 531, No. 251; but a trident before the bust of Cotys; *in very good condition:* *very pale EL. (or silver). size* $4\frac{1}{4}$. *wt.* $112\frac{3}{10}$ *grs.*

*** From the Ainslie collection; see Sestini lettere, vol. i. p. 43, No. 38. Probably many of the preceding are from that celebrated collection, but they cannot be identified

Cotys IV.; BACIAЄωC. KOTYOC.; *rev.* ΘKΦ. (529); Bust laureate of Sev. Alexander? see *Mt. Supp.* p. 532, No. 253; *very good condition:* *very pale EL. (or silver.) size* $4\frac{1}{4}$. *wt.* $117\frac{1}{10}$ *grs.* 2

1898 Sauromates V.; [BA]CIΛЄωC. CAY[POMA]TOY.; *rev.* ЄKΦ. (526); see *Mt. Supp*, p. 533, No. 256; *unfortunately in very bad condition, but the name and date quite certain; rubbed:*
very pale EL. (or silver). *size* 4. *wt.* $102\frac{6}{10}$ *grs.*

*** This is the identical coin published by Mionnet, from the Allier collection; see Dumersan, plate 10, fig. 7. It has been published as of silver, but it is very difficult to decide whether it be silver or pale electrum. The date on this coin and on the four preceding are very interesting.

Another; *rev.* Bust of Sev. Alexander, laureate, with two pellets before; ZKΦ. (527); see *Mionnet, Supp.* p. 533, No. 257; but there is on this coin a wreath before the bust of Sauromates; *in perfect condiction:*
very pale EL. (or silver). *size* $4\frac{1}{2}$. *wt.* $115\frac{1}{10}$ *grs.* 2

1899 Ininthimeyus; BACI[ΛЄωC]. ININΘIMHYOY.; *rev.* ЄΛΦ. (535); see *Mt. Supp.* p. 536, No. 264; *in very fair condition:* *Silver (or potin?)* *size* $4\frac{1}{2}$. *wt.* $92\frac{6}{10}$ *grs.*

*** See Mionnet's note (a) as to the representation on the reverse of this rare coin. It is of about the time of the Emperor Gordian. This is the identical coin from the Allier cabinet, described by Mionnet; see Dumersan, pl. 10, fig. 9.

Rhescuporis VII.? *obv.* BACIΛEωC. PHCKOYΠOPIΔOY. *rev.* AΞΦ (561); Bust of Gallienus? laureate, before it I. (or a sceptre?); compare a copper coin in *Mt. Supp.* p. 541, No. 284; *fair condition: not in Mionnet:*
Silver (or potin?) *size* $4\frac{1}{2}$. *rubbed weight* 103 *grs.*

*** From the Allier collection; see Dumersan, p. 66.

Another; *obv.* BACIΛEωC. PH[CKOYΠOP]IΔO. (sic.) *rev.* BΞΦ. (562); *very fair condition; not in Mionnet:*
Silver (or potin?) *size* $4\frac{1}{2}$. *weight* $111\frac{9}{10}$ *grs.* 3

*** In Mionnet there is nothing in silver or potin of this king, of a later date than 549.

KINGS OF THE BOSPHORUS, IN COPPER.

*** The correct classification or attribution of coins belonging to this interesting series, which have not dates, is still to be regarded as extremely unsettled and worthy of study. The following coins become, therefore, of importance, in consequence of their unusual state of preservation, as well as their rarity. The greater part of them, like the preceding, of

gold and electrum, are from the collection of the late Chevalier Allier de Hauteroche, and have been published and engraved by M. Dumersan; Descrip. des Méd. Ant. du Cabinet Allier, Paris, 4to. 1829. As they are for the most part newly discovered coins of the utmost rarity, and many unique, no attempt is made to distinguish the relative scarcity of each, except by reference, either to Mionnet, or to the interesting record of the Allier collection preserved by M. Dumersan, in the work so often quoted.

1900 Rhescuporis I.; see *Mionnet, Supp.* p. 487, No. 33; *Dumersan*, pl. 8, fig. 18. This is the identical coin described and engraved; *in fine condition:* *size* $6\frac{1}{2}$.

Rhescuporis I.; different type; *not in Mionnet;* compare p. 489, *Supp.* No. 41; see *Dumersan*, pl. 8, fig. 16. This is the identical coin; *perfect condition, but the legend rather off the edge:* . *size* $6\frac{1}{2}$.

*** On this class of coins the letters IB. (12) ΔK. (24) and MH. (48) often occur. It is presumed that these numerals can only be regarded as indicative of the current value of the coins. It will be noticed, (notwithstanding certain irregularities) that the larger pieces are those on which MH. occurs, and the smaller or thinner, those with IB.

Rhescuporis I.; TIBEPIOC. IOYAIOC. BACIAEYC. PHC. KOYΠOPIC.; for the *obv.* of this coin compare *Mt. Supp.* p. 487, the reverse of No. 34; and for the *rev.* compare the reverse of No. 36, p. 488; but see *Dumersan*, pl. 8, fig. 17, where this identical coin is engraved; *in very good condition:* . . *size* 8.

*** It was probably a mere motive of adulation or compliment, which induced some of these Kings to take the names of the Roman Emperors.

Another; see *Mt. Supp.* p. 488, No. 38; *obv.* the same as the preceding; *rev.* MH. within a wreath; *middling condition:* . *size* 7. 4

1901 Rhescuporis I? *obv.* his Portrait; *rev.* MH., Victory with a wreath and palm branch; *rather barbarous style of work; very middling condition:* *size* 6.

*** From the Allier collection; see Dumersan, p. 64.

Rhescuporis II.; *Mionnet, Supp.* p. 492, No. 58; *rev.* Tiberius, TIBEPIOY. KAIΣAPOΣ.; *perfect condition:* *size* $5\frac{3}{4}$.

Another; rather different style of mintage, see *Dumersan*, pl. 8, fig. 24. This is the identical coin there engraved; *in very good condition :* *size* 5.

Another; *rev.* Caligula; ΓΑΙΟΥ. ΚΑΙϹ[ΑΡΟϹ]. [ΓΕΡΜΑ.] ΝΙΚΟΥ.; see *Mt. Supp.* p. 493, No. 63; *very fair condition :* . *size* 5.

Mithradates; ΒΑϹΙΛ[ЄωϹ.] [Μ]ΙΘΡΑΔΑΤΟΥ.; see *Mt. Supp.* p. 494, No. 66; *not in the French cabinet; very fair condition, though broken :* *size* 6. 5

*** From the Allier collection.

1902 Gepæpyris, (Queen of Mithradates?) [Β]ΑϹΙΛΙϹϹΗϹ. ΓΗΠΑΙΠΥ[ΡЄΩϹ.] shewing distinctly the beginning of the name; see *Mt. Supp.* p. 496, No. 69, and *Dumersan*, pl. 8, fig. 15. This is the identical coin there engraved.

Another; shewing distinctly the ending of the name [ΓΗ-ΠΑ]ΙΠΥΡЄΩϹ.; *both in very fair condition, from the Allier cabinet:* . *size* 6. 2

*** It was the union of these two identical coins in the Allier cabinet, which enabled their learned owner to discover the name of this unknown Queen, and to correct the first faulty notions that her name was Pæpyris or Pæpiris. Even so late as the publication of Sestini's 2nd edit. of his Classes Generales, (1821) we find at page 62, ΒΑΣΙΛΙΣΣΗΣ ΠΕΠΑΙΠΙΡΕΩΣ. *vel.* ΓΕΠΑΙΠΙΡΕΩΣ. at which period she was considered to be the Queen of Sauromates I.; see the very curious notes on this matter in Mt. Supp. vol. iv. p. 494 (b and c); see also the note of Dumersan, following his description of these identical coins, at page 64; see further, another note by Dumersan on this subject, at page 66.

1903 Cotys I.; [ΤΟΥ]Α ΠΟΥΡΓΟΥ. ΤΕΙ[ΜΑΙ?]; for the type compare with *Mionnet, Supp.* p. 499, No. 86; *very fair condition :* . *size* $5\frac{1}{2}$.

*** This coin has the letters ΚΔ. (24) before alluded to, and is from the Allier cabinet.

Cotys I.; IB. in front of his Head with diadem, and monogram behind: *rev.* Head of Britannicus, ΚΑΙΣΑΡΟΣ. ΒΡΙΤΑΝΝΙΚΟΥ.; *not in Mionnet; probably unique and unpublished; very fair condition :* *size* $4\frac{1}{2}$.

Cotys I.; see *Mt. Supp.* p. 499, No. 89; *obv.* Claudius; *rev.* Agrippina; see *Dumersan*, pl. 9, fig. 6; *in very good condition :* . *size* 6. 3

*** This is the identical coin described by Mionnet, and engraved as above noted.

1904 Another; from the same collection; *very good condition: size* 6.

*** Probably found later, since it corrects the reading ΘΕΑΝ. which the engraver has indicated, and shews clearly that the legend begins ΙΟΥΛΙΑΝ. ΑΓΡΙΠΠ. [ΙΝΑΝ.] not ΘΕΑΝ. ΑΓΡΙΠΠΙΝΑΝ.

Cotys I.; see *Mt. Supp.* p. 500, No. 91; *obv.* Nero; *rev.* Poppæa; see *Dumersan*, pl. 9, fig. 7; *rubbed, but in fair condition; a new and curious coin in this series: size* $5\frac{1}{2}$.

Sauromates II. or III.? [ΒΑΣΙΛΕ]ωC. CAYPOMATOY. his Bust to the right, with diadem and paludamentum; *rev.* MH., Victory with crown and palm; *very fine condition, and very good work: . size* 7. 3

*** From the Allier cabinet; see Dumersan, p. 65.

1905 Rhescuporis III. *obv.* ΒΑCΙΛΕωC. ΡΗCΚΟΥΠΟΡΙΔΟC., his Bust to the right, with diadem and paludamentum; *rev.* the King on horseback, with a star under the horse; *in very good condition: . size* 6.

*** From the Allier collection; see Dumersan, p. 66.

Sauromates III? *obv.* same as before; *rev.* Female, with a round object in her extended right hand, and a spear in her left, seated between a bearded bust (of Severus), a star, the letter B., and an uncertain square object, divided into four square parts, with a pellet in each; *very good condition: . . size* $6\frac{1}{2}$.

*** From the Allier cabinet; see Dumersan, p. 65. If the bust be of Severus, this will be probably a coin of Sauromates IV.

Another; very interesting, from having the bust (of Severus) and the letter B. separately impressed, by means of a punch, or countermark, precisely where the same objects occur in the type of the preceding coin, proving this to be the earlier of the two, and indicative of a projected change in the type; *very well preserved: size* 7.

*** From the Allier cabinet; see Dumersan, p. 65. This class of countermarks seems likely to explain the motive of certain variations in the types of coins, and it is to be regretted that similar examples should be of such very rare occurrence. There is one in the British Museum (from the cabinet of Mr. Burgon) on which the countermark of an owl is stamped upon a particular portion of the

serpent on a coin of Pergamus, with ΑΣΚΛΗΠΙΟΥ. ΣΩΤΗΡΟΣ. indicative of a change in the type itself, which subsequently took place as shewn by a later coin from the same cabinet.

Sauromates III. or IV.; *obv.* BACIΛЄωC. CAYPOMATOY., Bust, bearded, and to the right, with broad diadem and the paludamentum: a different portrait; *rev.* the King on horseback, with a spear; behind the king is a star, and between the fore legs of the horse B.; *fine condition: size* 8.

*** From the Allier collection: see Dumersan, page 65.

Another; with different portrait; *rev.* an Eagle to the left, with wings extended, looking back, with a wreath in its beak; in the field PMΔ. (query 144); *in very fair condition: . . size* 6. 5

*** From the Allier cabinet; see Dumersan, p. 65.

1906 Sauromates III.; see *Mt. Supp.* p. 505, No. 112; *in fine condition: . . size* 7.

Rhæmetalces; see *Mt. Supp.* p. 510, No. 138; *in very good condition: . . size* 6.

Eupator; see *Mt. Supp.* p. 514, No. 158; with KΔ. (24); *in very good condition: . size* 6.

*** From the Allier cabinet; see Dumersan, p. 65.

Thothorses; BACIΛЄωC. ΘOΘωPCOY.; *rev.* Diocletian? ΓΠΦ. (586); see *Mt. Supp.* p. 544, No. 290, and *Dumersan*, pl. 10, fig. 10; *very good condition: size* $4\frac{1}{2}$.

*** From the Allier cabinet. The identical coin engraved.

Rhescuporis VIII? see *Mt. Supp.* p. 548, No. 309, and *Dumersan*, pl. 10, fig. 11; but on the coin (which is *well preserved*) are the letters OYCHCKOY., query to be read PHCKOY[ΠΟΡΙΔ]OY. *rev.* Bust of Constantine? under which is IX. (610), and ΛY.; *in perfect condition: size* 4. 5

*** This is the identical coin described and engraved, from the Allier collection.

(Greek Cities, in Silver, continued from page 256.*)*

CITIES OF MYSIA AND TROAS, IN SILVER.

1907 Assus, in Mysia; ΑΣΣΙΟΝ.; *obv.* Head of Minerva to the right, her helmet ornamented with a laurel wreath in front;

rev. as in *Mionnet*, p. 522, No. 50; see *Combe Brit. Mus.* tab. 13, fig. 22, but head of Minerva reversed; *very well preserved, and so rare that, according to Mionnet, the French Cabinet does not possess a specimen:*

size $2\frac{3}{4}$. *weight* $40\frac{7}{10}$ *grs.* 1

*** This is an unpublished variety.

(Greek Cities, in Silver, continued at page 277.)

COINS OF CYZICUS IN GOLD.

1908 Cyzicus, in Mysia; *obv.* Dog or Wolf? to the left, standing on a tunny-fish; *rev.* quadratum incusum; *very rare, and in very good condition:* *size* 1. *weight* $40\frac{5}{10}$ *grs.* 1

1909 Cyzicus; *obv.* Half Lion devouring, to the left, behind is a fish; *rev.* quad. incus.; *very rare, and in good condition:* *size* 1. *weight* $40\frac{4}{10}$ *grs.* 1

*** These are *Cyzicene Hectæ*. See the note at the end of the *Phocæan Hectæ*, page , explanatory of this new denomination of Greek coins.

STATERS OF CYZICUS, IN GOLD.

(Continued from page 246).

1910 Cyzicus; very slightly differing from lot 1782; *fair condition:* *size* $4\frac{1}{2}$. *weight* $247\frac{1}{10}$ *grs.* 1

1911 Cyzicus; *obv.* youthful Head of Pan? to the left, (as on coins of Arcadia) with fillet and a horn in front, on the tunny-fish; *rev.* quad. incus.; *in very good condition:* *size* $4\frac{1}{2}$. *weight* 247 *grs.* 1

1912 Cyzicus; *obv.* bearded bald and laureate head of Silenus? to the right, (compare *Mt.* p. 527, No. 75; pl. 43, fig. 1) on a tunny-fish; *in fine condition:* *size* $4\frac{1}{2}$. *weight* $246\frac{3}{10}$ *grs.* 1

*** The authenticity of this specimen is left to individual opinion.

1913 Cyzicus; *obv.* Griffin, walking to the left, with curled wings, (on a tunny-fish? off the coin?) *rev.* quad. incus.; *fine condition:* *size* $4\frac{1}{2}$. *weight* $247\frac{6}{10}$ *grs.* 1

1914 Cyzicus; *obv.* Lion to the right, standing on a tunny-fish, and holding in his paw and in his mouth an object which appears like the harpè of Perseus? *rev.* quad. incus.; *in fine condition:* *size* $4\frac{1}{2}$. *wt.* $245\frac{5}{10}$ *grs.* 1

*** Such a representation appears so unusual, that it is *possible* it may

be the limb of an animal, or other prey, in the mouth of the lion; blurred by fractures in the die, and accidentally taking the form of the Harpê. This can only be proved by another coin.

1915 Cyzicus; *obv.* Lion to the left, standing on a tunny-fish; *rev.* quad. incus.; *in fine condition:*
size $4\frac{1}{2}$. *weight* $245\frac{9}{10}$ *grs.* 1

Sabina; *rev.* Female sacrificing; CONCORDIA. AVG.; *rare.*

*** This medal puts forth pre-eminent claims to our eulogy. It might, likewise, suit collectors of medallions, as, according to Akerman (1844): "Among the numerous fine and interesting brass medallions of Antoninus, not one bears allusion to Britain."

1925 Ant. Pius; *rev.* BRITAN.; S.C. across the field of the coin; IMPERATOR. II. (iterum), and an elegant winged Victory standing on a globe, &c.; *very fine, and rare* 1

COINS OF ELECTRUM.

*** This interesting class of coins, generally distinguished by the denomination of *Electrum*, and considered to be of *uncertain attribution*, are well worth the study and attention of the Numismatist, as they may almost all be classed. Whether considered in the light of *the gold coins of the more important cities of the west coast of Asia Minor*, requiring classification, or as works of art, of a period *immediately connected with that of Pericles*, (but antecedent) they are equally interesting. Their *true denomination* may be fairly presumed to be *Hectæ*; and they were probably anciently called *Phocæan Hectæ, Cyzicene Hectæ*, &c. &c. according to the towns where they were struck. These coins immediately followed those of more archaic style, of gold, and of a slightly heavier weight, concerning which see the note to the Phocæan Hectæ at page 316.

ROMAN IMPERIAL COINS, IN SILVER.

(Continued from page 269.)

2051 Carausius; *rev.* the Emperor standing (his left hand resting on the hasta pura) and shaking hands with Britannia, who holds the trident in her left hand; EXPECTATE. VENI.; *an unique and very singular legend;* in the exergue, R.S.R. (Richborough?); *very well preserved, and extra rare* 1

*** This coin, of far better silver than Carausius' generally are, is the identical one engraved in Akerman, Vol. II. p. 154; and mentioned likewise at page 122 of his recent publication, "Coins of the Romans relating to Britain." A very interesting silver medal of this type, in the British Museum, reads, IXPECTATE. VENI. See also Echkel, Doct. Num. Vet., Vol. VIII. page 45.

2052 Carausius; *rev.* a Female, seated on a low stool, milking a cow; VBERVTA. AV. (sic.); in the exergue, R.S.R.; *tolerably well preserved* . . 1

*** This legend is unpublished.

2059 Carausius; *rev.* Wolf suckling the two Founders of Rome; ROMANO. RENOV.; in the exergue, R.S.R.; *very fine, rare, and of good silver, pierced* . 1

*** It is probable that the letters of the exergue stand for RVTVPIAE. (Richborough) SIGNATA. as coins of Carausius are frequently found in the neighbourhood of Richborough; Akerman, page 121.

2060 Carausius; *rev.* type and legend as the last; *not very well preserved, but still very valuable, owing to its rarity and interesting reverse* . . 1

We do not believe that "any" collection possesses eleven medals (in silver) of Carausius.

Cius; Orbiana; *rev.* ΚΙΑΝΩΝ., Hero seated on a rock to the right, adjusting his sandals; *fine, and very rare:* *size* 6.

*** This is the identical coin published and illustrated by Mr. Akerman in the Gentleman's Magazine for Jan. 1835.

Hadrianopolis; Gordian; *rev.* tetrastyle Temple; *fair:* *size* 7. 5

2122 Bithynium; Antinöus (Medallion); see *Mt. Supp.* p. 20, No. 100; *obv.* Η. ΠΑΤΡΙϹ. ΑΝΤΙΝΟΟΝ. ΘΕΟΝ., Bust of Antinöus to the left; *rev.* ΒΕΙΘΥΝΙΕΩΝ. ΑΔΡΙΑΝΩΝ., Antinöus standing to the right, looking back, habited in a tunic? and chlamys? a pedum in his left hand, and his right (holding a small ill-defined object?) stretched towards a tall reed, with flag-leaves pendant on both sides, near which in the distance, beyond the figure of Antinöus, stands a bull; above is a star; *of the highest degree of rarity; in very fine preservation, very clean, and of fine yellow brass:* . . *size* 11. 1

*** This fine and rare medallion bears traces on the edge of having been set in a silver rim or mounting by the ancients. It was struck in the native city of Antinöus, which was situated on the banks of the river Sangaris. The elegantly executed type of the reverse has

every appearance of having been copied from a painting. In the symbolical language of antiquity, it may be said to represent *Antinöus as a Shepherd, by the side of the river Sangaris at night*, and probably commemorates some particular event of his life not mentioned in history; see Pausanias, *Arcadic, cap. ix. towards the end.*

2123 Hadrianopolis, in Bithynia; Antinöus, (Medallion); see *Mt.* vol. 2, p. 434, No. 132; *of extreme rarity, but in rather middling condition; looks sandy, but is genuine:* *size* 11. 1

2124 Nicæa; Messalina; ΜΕΣΣΑΛΙΝΑ. ΣΕΒΑΣΤΗ. ΝΕΑ. ΗΡΑ.; see *Mt.* p. 450, No. 213; *in very fair condition, and of clean yellow brass:* . *size* $8\frac{1}{2}$.

*** This coin has the edge smooth, and an unpleasant sandy look on both sides, but is genuine, and of the utmost rarity.

Nicæa; Domitian; *rev.* the Farnesian Hercules; see *Mionnet, Supp.* vol. 5, p. 85, No. 431, and *Dumersan*, pl. 11, fig. 4; *fine, and an extremely rare and interesting reverse:* *size* 6.

*** From the Allier collection; this being the identical coin engraved and published as inedited.

Nicæa, in Bithynia; Commodus; *rev.* ΚΟΜΟΔΕΙΑ., three naked Figures (Athletæ?) standing round a vase, (anointing themselves?); compare *Mt.* vol. 2, p. 457, No. 252; *extremely rare, and in very fair condition:* *size* 8.

Nicæa; Tranquillina; *rev.* Figure in a hexastyle Temple; *fine:* . *size* 6. 4

2125 Nicomedia; Macrinus; *rev.* the Staff and Serpent of Æsculapius; *very fair condition:* . *size* 4.

Tium; ΑΝΤΙΝΟΩΙ. ΗΡΩΙ., Head of Antinöus to the left; *rev.* [ΤΙ]ΑΝΟ[Ι.]; see *Mt. Supp.* p. 259, No. 1507; *head very good, reverse very middling, but of extreme rarity:* . . *size* 9.

*** In proof of the genuineness of the rare coin forming lot 2123, and the Messalina in lot 2124, observe the peculiar sandy appearance on *a small portion* of this most undoubted coin. It is a peculiarity in the metal, (yellow brass) used about this period in the coinage of Bithynia and Mysia.

Cyzicus; Faustina jun.; *rev.* Diana in hunting dress, with bow; *rare, and very fine:* . *size* 7.

Cyzicus; Diadumenian; *rev.* Bull; *very good condition:* *size* 5. 4

2126 Tium; Antinöus; as in the preceding lot; *much rubbed, and in very bad state on both sides: size* 9.

Cyzicus; Faustina jun.? KOPH. CΩTEIPA. [KYZIKHNΩN.]; *rev.* Galley; *rare, and very fair state: size* 9.

Lampsachus; Severus; *rev.* ΛANΨAKHN[ΩN.] (sic.) priapric terminal Figure holding thyrsus and vase near an altar, on which is fire burning; *very good condition, and extremely rare: size* 6.

Pergamus; Trajan; tetrastyle Temple on *obv.* and *rev.*; see *Mt. Supp.* p. 434, No. 962; *very rare, and very good condition: size* 7.

*** This coin is of the same metal as that pointed out in the note to the coin of Tium in lot 2125. It has not been cleaned; but if cleaned would look sandy like the Messalina in lot 2124.

Pergamus; Commodus; *rev.* Æsculapius; *very good condition: size* 5.

Pergamus; Commodus; *rev.* Æsculapius in a hexastyle temple; *very rare, but bad condition on both sides: size* 9½. 6

2127 Pergamus; Ant. Pius, (Medallion); *rev.* the Apollo of Miletus and Æsculapius standing; *very fine, and rare: size* 10.

*** This coin is also of the same metal before mentioned.

Pergamus; Caracalla, (large Medallion); *rev.* the Emperor on horseback, followed by a male figure; on the right is a statue of Æsculapius on a high base; *in very good condition, and extremely rare: size* 13½. 2

2128 Alexandria-Troas; Caracalla; see *Dumersan*, pl. 13, fig. 3; *good condition: size* 6.

Alexandria-Troas; Geta; *rev.* Apollo naked, to the left, with one foot on a base, holding a branch of laurel; *good condition, and rare: size* 5½.

Alexandria-Troas; Caracalla; *rev.* Wolf, with Romulus and Remus; *fair condition: size* 6.

Alexandria-Troas; Caracalla; *rev.* Eagle, with bull's head in its talons; *fair condition: size* 6.

Alexandria-Troas; Alex. Severus; *rev.* Tripod; *very middling condition: size* 3.

Alexandria-Troas; Maximus; *rev.* Horse; *very good condition: size* 6.

Alexandria-Troas; Gallus; *rev.* Figure on a griffin; *good condition, and rare:* . *size* 6.

Alexandria-Troas; Valerian; *rev.* Horse; *fine:* *size* 4.

Dardanus; Julia Domna; *rev.* ΔΑΡΔΑΝΙΩΝ., helmeted Bust of Minerva to the right; *very fine, and extremely rare:* . . *size* $4\frac{1}{2}$.

Ilium; M. Aurelius; *rev.* CKAMANΔPOC. IΛIЄΩN., the Scamander personified as a bearded old man, half draped and recumbent, with a vase under his arm; *very fine, and extremely rare:* . *size* $5\frac{1}{2}$. 10

*** This very interesting coin appears not to exist in the French collection.

(Greek Cities, in Copper, continued at page 312.)

STATER OF CLAZOMENE, IN GOLD.

2129 Clazomene; *obv.* winged Half Boar to the right; *rev.* quad. incusum; *unpublished? and extremely fine:* *size* $4\frac{1}{2}$. *weight* 217 *grs.* 1

*** There is no indication of the tunny fish on this coin; and its weight differs from that of the Cyzicene staters. It is, therefore, to be distinguished from the analogous type, (really of Cyzicus) engraved by Mionnet, Supp. Vol. 5, pl. 2, fig. 2, and may be pretty safely ascribed to Clazomene, especially by the help of the weight of the following coin.

(Greek Cities, in Silver, continued from page 281.)

CITIES OF IONIA, IN SILVER.

2130 Clazomene; *obv.* winged Half Boar to the right; *rev.* quad. incus.; *extremely rare, and in very good condition:* *size* 4. *weight* 107 *grs.*

*** The weight of this silver coin being half the weight of the gold stater, (which it precisely resembles in type and age) favours extremely the classification of the gold coin to Clazomene. The weight of coins is often a most useful help to the correct classification of the uncertain, though hitherto neglected.

Clazomene; same type; *very fine:* *size* 2. *wt.* $14\frac{4}{10}$ *grs.* 2

2131 Clazomene; *obv.* full faced Head of Apollo, laureate; *rev.* KΛAΣO[MENIΩN.] HPAKΛEIΔ[HΣ.?] Swan to the left, with head turned back and wings expanded; *presumed*

to be unique, and unpublished of this type; in perfect condition, and fine work, but the obverse a little injured by oxide: . *size* $6\frac{1}{2}$. *weight* $250\frac{8}{10}$ *grs.* 1

COIN OF EPHESUS, IN GOLD.

2132 Ephesus; precise type of *Mionnet Supp.* vol. 6, pl. 3, fig. 2, with the small stag and bee on each side the base of the statue on the reverse, but without any letters; *unpublished, and in perfect condition, probably unique:*
size 3. *weight* $84\frac{3}{10}$ *grs.* 1

*** This coin is of pure gold, and of a comparatively low period. Its weight offers some difficulty as to its denomination. It must however be assimilated to the weight of the silver coin forming lot 2134, and also to the weight of the fine gold coin of Clazomene, in the French cabinet, (Mt. p. 63, No. 3) which weighs $87\frac{9}{10}$ English grains. The gold coins of Ephesus and Smyrna, in the same magnificent collection, do not help the difficulty, being both attic didrachms.

CITIES OF IONIA, IN SILVER. *(Continued.)*

2133 Ephesus; *obv.* EΦ., Bee; *rev.* quad incus.; *extremely rare, and in very good condition:* *size* 4. *wt.* $117\frac{1}{10}$ *grs.*
Another; *fine, and very rare:* *size* $3\frac{1}{2}$. *wt.* $49\frac{5}{10}$ *grs.*
Ephesus; *obv.* EΦ., Bee; *rev.* EΦ., two stags' heads and necks facing; see *Hunter*, tab. 26, fig. 5; *extremely rare, and in very good condition:* *size* 1. *wt.* $14\frac{2}{10}$ *grs.* 3

2134 Ephesus; *obv.* Head of Diana to the right, with the usual ornament in front, and the hair flowing; *rev.* EΦE., Quiver and Bow, with a bee in the field, and EXEANA(Ξ.); see *Mionnet, Supp.* vol. 6, p. 115, No. 230; *in perfect condition:* . *size* $4\frac{1}{2}$. *weight* $86\frac{2}{10}$ *grs.* 1

*** The first coin discovered of this new type is in the collection of Mr. Huxtable. That above described is presumed to be the second known, and is the identical specimen published by Mionnet, who has singularly erred in his notion of its rarity. A long passage in Polyaenus Strat. (lib. vi. cap. 49 Anaxagoras) gives a peculiar interest to this remarkable coin; since there can exist no reasonable doubt that the EXEANAΞ. whose name occurs on it, is the individual mentioned by Polyaenus. The coin, by its style of work and peculiar type, can be readily referred to the precise period of time, (during the reign of Lysimachus, and shortly after the death of Alexander) to which the narrative of Polyaenus applies; and the name is too remarkable, and of too rare occurrence, to permit the supposition that

two persons named Echeanax, should have been contemporaneously mixed up with Ephesian affairs; see (in connexion with *the type* of this coin) a paper "*On the City of Ephesus when called Arsinoe,*" in the Numismatic Chronicle, Vol. 2, page 171; and the editor's note at page 176, as well as the plate illustrative of the paper.

2135 Ephesus; type of *Mt. Supp.* vol. 6, pl. 3, fig. 4; but with ΚΑΛΛΙΣΤΡΑΤΟΣ.; *in very fine condition:*
size 5. *weight* $102\frac{4}{10}$ *grs.* 1

*** This elegant coin presents us with a most happy effort of Asiatic Greek art in the delineation of female beauty, a little anterior to the descent of Alexander the Great into Asia. There is such an appearance of individuality in the features, as almost to lead to the opinion that this Head of Diana hands down to us the real portrait of an Ephesian Lady, instead of an ideal representation of the Goddess; but such an idea, however pleasing, seems inadmissible.

2136 Another; with ΜΙΝΝΟΣ.; *also a very beautiful coin, in perfect condition, and extremely fine work:*
size 5. *weight* $100\frac{5}{10}$ *grs.* 1

2137 Another; with ΕΡΜΩΝΑΞ.; *in perfect condition, and very fine workmanship:* *size* 5. *weight* $101\frac{2}{10}$ *grs.* 1

2138 Another; with ΠΥΘΑΓΟΡΑ[Σ.]; *very sharp on both sides, and very good work:* *size* 5. *weight* $101\frac{3}{10}$ *grs.*

Erythræ; type of *Mionnet*, pl. 76, fig. 4; ΔΙΟΝΥΣΙΟΣ.; *fine:* *size* 3. *weight* $54\frac{7}{10}$ *grs.* 2

2139 Ephesus; type of that in the preceding lot; bust of Diana, and ΝΑΥΚΡΑΤΗΣ.; *very fine on both sides, and very good work:* *size* 5. *weight* $100\frac{7}{10}$ *grs.*

Erythræ; type of that in the preceding lot, but with ΔΙΟΠΕΙΘΗΣ.; *fine:* *size* 3. *weight* $54\frac{9}{10}$ *grs.* 2

2140 Ephesus; type of *Mt. Supp.* pl. 3, fig. 5; ΞΗΝΟΔΟΤΟΣ.; *fine:* *size* 6. *weight* $232\frac{5}{10}$ *grs.*

Ephesus; type of that in the preceding lot; Bust of Diana, and ΣΚΟΠΑΔΗΣ.; *in very good condition:*
size 5. *weight* $97\frac{5}{10}$ *grs.* 2

2141 Ephesus; type of *Mt. Supp.* pl. 3, fig. 5; ΦΕΡΑΙΟΣ., *very good condition:* *size* $6\frac{1}{4}$. *weight* $221\frac{2}{10}$ *grs.*

Ephesus; with Bust of Diana, as in the lot preceding; ΔΙΟΝΥΣΙΟΣ.; *fair condition:*
size 5. *weight* $100\frac{3}{10}$ *grs.* 2

2142 Ephesus; type of *Mt. Supp.* pl. 3, fig. 5, with ΗΓΕΛΟΧΟΣ.; *in fair condition:* *size* 6. *weight* $228\frac{7}{10}$ *grs.*

Ephesus; with Bust of Diana, as in the lot preceding, and EKATAIOΣ.; *good work, and fine condition:*
size 5. *weight* $101\frac{3}{10}$ *grs.* 2

2143 Ephesus; a cistophorus date NΓ. (year 53); *fine:*
size $6\frac{1}{2}$. *weight* $195\frac{3}{10}$ *grs.*

Ephesus; see *Mt.* p. 86, No. 188; NIKOΛOXOΣ.; *good condition:* . *size* 4.

Ephesus; with Bust of Diana, as in the preceding lot, and ΓPYΛIΣ. *(false):* *size* 5. *weight* $123\frac{8}{10}$ *grs.* 1

GOLD COIN OF ERYTHRÆ?

2144 Uncertain; *obv.* Head of Hercules, with lion's skin, to the left, *in archaic style; rev.* quad incus. divided into four parts, two of the squares deep, and two shallow; *very rare, unpublished, and in fine condition:*
size $1\frac{1}{2}$. *weight* $38\frac{8}{10}$ *grs.* 1

*** This coin is of gold, and anterior to the class of electrum coins. By the type it is presumed to belong to Erythræ. It is a *Hecta*.

CITIES OF IONIA, IN SILVER. *(Continued.)*

2145 Erythræ; (the Tetradrachm) ΦANNOΘEMIΣ.; see *Mionnet, Supp.* p. 214, No. 905; *of extreme rarity, and in perfect condition:* *size* $6\frac{1}{4}$. *weight* 226 *grs.* 1

2146 Erythræ; (Drachm) same type; ΔIOΠEIΘHΣ.; *very fine:*
size 3. *weight* $54\frac{9}{10}$ *grs.*

Erythræ; see *Mionnet, Supp.* vol. 7, pl. 6, fig. 1, and vol. 3, p. 568, No. 151; *very rare, and in perfect condition:*
size 4. *weight* $109\frac{2}{10}$ *grs.* 2

*** This coin was formerly classed by Mionnet to Celenderis, but he recognizes it in the Supp. (p. 213, No. 898) to be of Erythræ, in Ionia, to which place it really belongs.

2147 Erythræ; (Drachm) like the first in the preceding lot; AΠEΛΛAΣ.; *very fine:* *size* 3. *weight* $55\frac{9}{10}$ *grs.*

Erythræ; type of *Mt.* pl. 51, fig. 5, but the letters are retrograde, and the flower, or star, has only eight rays; *rather rubbed:* *size* $3\frac{1}{2}$. *weight* $68\frac{7}{10}$ *grs.* 2

*** This variation in the type is new and very curious.

2148 Another; type as usual; *rare, but rather rubbed:*
size $3\frac{1}{2}$. *weight* $71\frac{1}{10}$ *grs.*

Erythræ; (two Drachmæ) type as before; APIΣTEAΣ. and AΠEΛΛAΣ.; *both fine:*

size 3. *weights* $55\frac{9}{10}$ *grs. and* 55 *grs.* 3

2149 Erythræ; (Drachm) type as before, with MOΛIΩN. in very small letters, and a monogram; *rare, and fine:*

size 3. *weight* $49\frac{3}{10}$ *grs.*

Another; with ΠEΛOΠIΔHΣ. in very small letters, and a monogram; *rare and fine:* *size* 3. *wt.* $51\frac{3}{10}$ *grs.*

Another; with AΣKΛHΠIAΔHΣ. ΔHMAΔ[OY.?] *very rare, and in perfect condition:*

size 3. *weight* $55\frac{9}{10}$ *grs.*

Magnesia (ad Mæandrum); *obv.* Horseman with lance, to the right; *rev.* MAΓN., Bull tossing, to the left, behind is a ear of wheat, and underneath [A]ΠOΛΛO....; *extremely rare, and in perfect condiction:*

size 2. *weight* $25\frac{8}{10}$ *grs.* 4

2150 Magnesia (ad Mæandrum); type of *Mt. Supp.* pl. 4, fig. 3; see *Hunter*, tab. 35, fig. 9; MAΓNHTΩN. EPAΣIΠΠOΣ. APIΣTEOY.; *a remarkably beautiful and perfect specimen of this most rare coin:* *size* 9. *wt.* 248 *grs.* 1

*** The edge of this fine coin has been filed or smoothed, but it has sustained no real injury.

(Greek Cities, in Silver, continued at page 315.*)*

GOLD COINS OF MILETUS?

2151 Uncertain; (large elongated Stater of pale Gold); *obv.* Head of a Lion, with the mouth open and tongue out, to the left; *rev.* a rude square indentation; *unpublished? in perfect condition, and of the greatest rarity:*

size 5. *weight* $247\frac{9}{10}$ *grs.* 1

*** This appears to be the oldest coin in the collection, and would, indeed, probably be the oldest coin of any collection. It may be referred to the most remote period to which Herodotus intended to allude, when he ascribed to the Lydians the invention of coinage, and shews every indication of its early date. The peculiarity in the form and style of the Lion's Head, is the motive for ascribing it to Miletus, in preference to Cyzicus, or other places.

2152 Uncertain; the same Lion's Head to the left, on a round buckler; *rev.* an indentation nearly square, divided into

four uneven parts; *of extreme rarity:*

size $1\frac{1}{2}$. *weight* $42\frac{6}{10}$ *grs.* 1

*** This coin is of gold, and should not be confused with the class of electrum coins. It is in perfect condition, and presumed to be inedited. It is the Hecta of the above stater; see the note on this new denomination of gold coins at the end of lot 2260, page 316.

2153 Uncertain; *obv.* full-faced Head of a Lion (apparently the same lion) seen in front, of a very peculiar and rude style of antiquity; *rev.* quad. incus; *unpublished? and in perfect preservation:* *size* $1\frac{1}{2}$. *weight* $41\frac{5}{10}$ *grs.*

*** This coin is struck upon a small mass of gold of most irregular form, as it seems to have been thrown from the crucible. Its weight shews it to be a Milesian Hecta like the preceding.

Miletus? compare *Mionnet*, pl. 36, fig. 3; but attached to the head of the lion just above the eye is a star; *rev.* an oblong indentation divided into two unequal parts; *in very good condition; pale gold:*

size 2, *elongated.* *weight* $72\frac{8}{10}$ *grs.* 2

*** This coin has a small countermark on the edge. Such marks, apparently from a small punch, frequently occur on coins of this type.

2154 Another; with six curious ancient countermarks on the edge of the coin, one of which is a triquetra? and another a small head (of Apollo?); *well preserved, and of pale gold:*

size 2, *elongated.* *weight* $72\frac{6}{10}$ *grs.*

*** It is rare to find one of these coins countermarked with so many symbols as this.

Uncertain; *obv.* four irregular projecting masses, as if impressed from an incuse indented square; *rev.* an indented square, divided into four uneven parts; *rare, and very curious:* *size* $\frac{1}{4}$. *weight* $4\frac{8}{10}$ *grs.* 2

COINS OF ELECTRUM. *(Continued from page 283.)*

*** It has not been considered necessary, either here, or at page 282, to specify the separate weight and size of these well known coins. For the satisfaction of the young Numismatist, it may, however, be remarked, that they all closely approximate to 40 grains Troy, and vary in size from No. 1 to No. $1\frac{1}{2}$ of the scale of Mionnet, on the first page of this Catalogue. As specimens of beautiful art, they are frequently so fine, as to yield to nothing in the whole Greek series.

*** A most interesting Athenian inscription, preserved in the British Museum, is the authority for considering the two preceding coins as PHOCÆAN HECTÆ; a denomination of Greek money which is presumed to be now for the first time identified, and applied to the class of coins, to which, on consideration, it will be found to belong. It is, as its name implies, the *sixth* part [of the Stater,] which weighs about 248 grains, and consequently a Hecta (when of equal antiquity with its Stater) will weigh about $41\frac{2}{3}$ grains. The inscription alluded to has been published by Boeckh, *(Corpus Inscriptionum Græcarum,* vol. 1, pars II., *Inscriptiones Atticæ,* page 236), as follows—§ 19. Φωκαϊκῶ στατῆρε II. ἔκται Φωκαΐδες.....On which Boeckh remarks, "Phocaici stateres aurei fuerunt: "Εκται alibi non reperiuntur nisi in hoc ipso tilulo. § 22. Quae quum sextam stateris partem constituisse videantur, argenteæ fuerint." §. 22. "Εκτη Φωκαΐς καὶ, &c. It is highly probable that Boeckh would not have regarded the Hecta as a silver coin had he been aware of the existence of (comparatively) such abundant specimens of gold coins, exactly of the required weight to prove themselves to be Hectæ, and belonging precisely to the towns of which we have gold Staters, as Cyzicus, Phocæa, Miletus, &c. It may be further remarked, that the period to which the Staters and Hectæ in question belong, is antecedent to the age of the inscription, which may be referred to 400 years B. C.

CITIES OF IONIA, IN SILVER. *(Continued.)*

2261 Priene; type of *Mionnet,* p. 187, No. 891, but larger, and with ΠΡΙΗ. ΕΠΑΜ..; *in extremely good condition, and of the highest rarity:* *size* 4. *weight* 76 *grs.* 1

2262 Smyrna; type of *Mt. Supp.* pl. 5, fig. 4, with ΠΜΥΡΝΑΙΩΝ. ΗΡΑΚΛΕΙΔΗΣ. in two lines; see *Mt.* p. 190, No. 914, but a lion instead of a leopard; *of the utmost rarity, and as it came from the die:* *size* $8\frac{1}{2}$. *wt.* $255\frac{9}{10}$ *grs.* 1

*** The estimation of the rarity of the silver tetradrachms of Smyrna in Mionnet is quite erroneous. The oldest resident collectors at Smyrna have never seen a specimen. The cabinets of Europe were supplied by a small hoard discovered in Pellerin's time, since which period none have been found. Few coins are more rare than the Tetradrachms of Smyrna.

*** The rarity of the aureus of Diadumenian is such, that even the D'Ennery, Trattle, and Nott collections were without it. None have been offered for sale in London these last seven years. There is a most beautiful, and certainly genuine one, in the Lavy Cabinet at Turin. See Museo Num. Lavy, No. 3115. Mr. Miles had one which he valued at £ 50.

The star in the field of the reverse is almost always seen on the medals of this "monster," as Tristan calls him, but *never* on those of Caracalla; besides he is here (nay generally) styled IMP., and Caracalla very seldom.

2535 Another; *rev.* a monogram, beyond the legend, on each side of the Apollo; *very good youthful portrait; but the rev. middling:* *size* $6\frac{1}{2}$. *weight* $255\frac{2}{10}$ *grs.*

Seleucus IV.; usual type; *rev.* wreath and palm in the field, to the left, and a monogram in exergue; *fine condition:*

size $8\frac{1}{4}$. *weight* $263\frac{4}{10}$ *grs.* 2

2536 Antiochus III.; usual type; *rev.* a monogram in the field, to the left; *well preserved:* *size* $8\frac{1}{4}$. *weight* 262 *grs.*

2538 Antiochus IV.; usual type; *rev.* Jupiter sitting; *Mionnet, Supp.* vol. 8, tab. 12; ΘΕΟΥ. ΕΠΙΦΑΝΟΥΣ., and with the title ΝΙΚΗΦΟΡΟΥ.; a monogram in the field to the left; *a very fine coin, in perfect condition, and rare:*

size 9. *weight* 257 *grs.* 1

2539 Another; (with NIKHΦOPOY.) *equally fine and perfect, and rare:* *size* $8\frac{3}{4}$. *weight* 260 *grs.* 1

2540 Another; (with NIKHΦOPOY.) *in excellent condition, and rare:* *size* $8\frac{3}{4}$. *weight* $255\frac{2}{10}$ *grs.* 1

2541 Another; without NIKHΦOPOY., and with a monogram in exergue; *a beautiful coin, in perfect condition:* *size* $8\frac{3}{4}$. *weight* 258 *grs.* 1

2542 Another; *equally beautiful and perfect, especially the reverse:* *size* 9. *weight* $258\frac{7}{10}$ *grs.* 1

2543 Another; in higher relief, and two stars in the ends of the diadem; *fine condition and very rare:* *size* 9. *weight* $256\frac{2}{10}$ *grs.* 1

2544 Another; with two stars in the ends of the diadem; *not in such high relief, but a very fine coin:* *size* 9. *weight* 257 *grs.* 1

2545 Another; but the stars not visible; *a very fine coin, in excellent condition:* *size* $8\frac{3}{4}$. *weight* 256 *grs.* 1

2546 Antiochus V.; usual type; EYΠATOPOΣ., with a monogram in the field, to the left; *a most rare and beautiful coin, very highly preverved:* *size* 9. *weight* $255\frac{2}{10}$ *grs.* 1

2547 Another; with E. in the field; *but suspected:* *size* 8. *weight* $239\frac{6}{10}$ *grs.* 1

2548 Demetrius I. and Laodice; *Mt. Supp.* vol. 8, p. 35, No. 182; *obv.* their Heads both together, in profile; *rev.* BAΣIΛEΩΣ. ΔHMHTPIOY. ΣΩTHPOΣ., usual type; in the field, a palm branch and monogram; *in very good condition, though somewhat rubbed, and unique:* *size* 7. *weight* $252\frac{3}{10}$ *grs.* 1

*** This most interesting coin was formerly in the cabinet of John Barker, Esq., British Consul at Aleppo, and is the only one known which gives us a portrait of Laodice. It is the identical coin first engraved by the Chevalier Allier de Hauteroche (*Essai sur une Tessère antique, &c., 4to., Paris,* 1820), and afterwards published by Millingen, *Cities and Kings,* pl. 5, fig. 21.

2549 Demetrius I. (Soter); with a wreath round the head; *rev.* as usual, seated Female with cornucopia; *in very fine condition:* *size* $7\frac{1}{2}$. *weight* 258 *grs.* 1

2550 Another; with a monogram in the field in front of the seated female, who, on this coin, is represented as usual, but has

the peculiarity of being only half draped, the upper part of the figure being naked; *in fine condition, unpublished, and probably unique:* *size* $8\frac{3}{4}$. *weight* 258 *grs.* 1

*** See a paper in the Numismatic Journal, vol. 1, pages 112 and 113, where a doubt is expressed (contrary to the opinion of Visconti) whether the seated female figure on the reverse of these coins be intended for the goddess Ceres. It is presumed that the reverse of the coin just described tends to prove that the doubt was well founded, since it can scarcely be thought probable that Ceres was ever represented as above described.

2551 Demetrius I.; with a wreath round the portrait; *rev.* as usual, with the title ΣΩΤΗΡΟΣ., and two monograms in the field, in front of the seated female figure; in the exergue is the date ΘΝΡ. (year 159 of the æra of the Seleucidæ); *very fine condition, and rare:*

size $8\frac{1}{4}$. *weight* 256 *grs.* 1

2552 Another; with ΣΩΤΗΡΟΣ., and date ΑΞΡ. (year 161); *very fine:* . . *size* 8.

2553 Another; with the same date; *as finely preserved as the last, but the monograms not visible:*

size 8. *weight* 257 *grs.*

2554 Another; with date ΒΞΡ. (year 162); *very fine condition:*

size 8. *weight* $258\frac{4}{10}$ *grs.* 1

2555 Another; with the same date; *very fine:*

size $7\frac{1}{2}$. *weight* $254\frac{6}{10}$ *grs.*

2556 Demetrius I. (Soter); *obv.* his Bust; *rev.* Eagle and palm as usual; in the field ΣΙΔΩ., an acrostolium, and two monograms; date ΘΞΡ. (year 169); *very fine and rare:*

size $6\frac{1}{2}$. *weight* $214\frac{7}{10}$ *grs.* 1

*** It is curious to observe that this coin is struck at Sidon, and is a tetradrachm adjusted to the Ptolemaic or Ægyptian Talent. The coins of the preceding Syrian Kings are all adjusted to the Attic Talent.

2557 Demetrius I. (Soter); *rev.* seated Female Figure; *fine portrait, but date not visible:* *size* 8. *wt.* $258\frac{2}{10}$ *grs.*

Alexander I. (Bala); *rev.* Eagle and palm; struck at Sidon, date ΕΞΡ. (year 165); *in fair condition:*

size 7. *weight* $211\frac{4}{10}$ *grs.* 2

*** Tetradrachm adjusted to the Ptolemaic Talent.

2558 Demetrius I.; usual type, with date ΞΡ. (year 160), and title ΣΩΤΗΡΟΣ.; *very fair condition:* *size* 8.

Alexander I. (Bala); *rev.* Jupiter seated, ΘΕΟΠΑΤΟΡΟΣ. ΕΥΕΡΓΕΤΟΥ., and date ΔΞΡ. (year 164); *fine and rare: size* $9\frac{1}{2}$. *weight* $252\frac{8}{10}$ *grs.* 2

2559 Alexander I. (Bala); *obv.* his Bust; *rev.* Eagle with palm, standing on the prow of a galley; in the field, a club, and the monogram of Tyre, with another monogram, and the date ΕΞΡ. (year 165); *a most beautiful, rare, and perfect coin: size* 8. *weight* 219 *grs.* 1

*** This tetradrachm is struck at Tyre and adjusted to the Ptolemaic Talent. Being so well preserved, it gives nearly the full weight of the Ægyptian drachma, namely 55 grains Troy.

2560 Another; with date ΓΞΡ. (year 163); *also extremely fine and perfect: size* 7. *weight* $219\frac{4}{10}$ *grs.* 1

2561 Another; with date ΕΞΡ. (year 166); *rev.* Eagle, and in the field, a trident and a monogram; *very rare, and extremely fine and perfect: size* 7. *weight* $217\frac{8}{10}$ *grs.* 1

*** Struck at Berytus, and also adjusted to the Ptolemaic Talent.

2562 Alexander I. (Bala); *rev.* ΘΕΟΠΑΤΟΡΟΣ. ΕΥΕΡΓΕΤΟΥ., Jupiter sitting, as usual, but holding *a thunderbolt in his hand* instead of the little winged Victory; in exergue, date ΕΞΡ. (year 165) and ΣΙΔΩ.; *extremely well preserved, and probably unique with this peculiarity: size* 8. *weight* $255\frac{7}{10}$ *grs.* 1

*** Although struck at Sidon, this coin offers the singular peculiarity of being adjusted to the Attic Talent, instead of the Ptolemaic, and no doubt as to its authenticity.

2563 Another; *rev.* Jupiter sitting, usual type, with date ΕΞΡ. (year 166) and Φ. in the exergue; in the field, ΔΟ. in monogram; *fine condition: size* $8\frac{1}{4}$. *weight* $257\frac{6}{10}$ *grs.* 1

2564 Another; with ΓΞΡ. (year 163), a monogram in the exergue, and a cornucopia in the field; *well preserved: size* 8. *weight* $252\frac{8}{10}$ *grs.* 1

2565 Another; *obv.* his Bust; *rev.* Eagle on the prow of a galley, holding a palm branch; in the field, the club and monogram of Tyre, the date ΕΞΡ. (year 166), and another monogram; *fine condition: size* 8. *weight* $216\frac{6}{10}$ *grs.* 1

*** Struck at Tyre and adjusted to the Ptolemaic Talent.

2566 Demetrius II.; *rev.* ΘΕΟΥ. ΦΙΛΑΔΕΔΦΟΥ. (sic.) ΝΙΚΑΤΟΡΟΣ., Apollo seated; in the field a palm branch; in

the exergue the date ΠΞP. (year 167), and a monogram; *extremely rare and beautiful: size* $9\frac{1}{4}$. *wt.* 261 *grs.* 1

2567 Another; with a wreath round the portrait; in the field, the same symbol and monogram, with XAP. in monogram between the legs of Apollo, but the date is off the edge; *a very fine coin, especially the portrait, and extremely rare: size* 8. *weight* $251\frac{6}{10}$ *grs.*

2568 Demetrius II.; *rev.* Eagle with palm branch; in the field, ΣIΔΩ. and the acrostolium, with the date ΘΞP. (year 169) and a monogram; *fine condition: size* 7. *weight* 218 *grs.* 1

2569 Demetrius II.; with long beard; *rev.* ΘEOY. NIKATOPOΣ., Jupiter seated; in exergue ΠΠP. (year 187); in the field three monograms; *a very fine and very rare coin: size* $8\frac{1}{2}$. *weight* $252\frac{5}{10}$ *grs.* 1

*** These coins with the beard were struck after the return of Demetrius to the throne from his long captivity of nine years in Parthia. This coin is remarkable, as it bears the date of the year during which he was murdered at Tyre.—See Gough, *Coins of the Seleucidæ*, page 105 et seq.

2570 Another; with date ΔΠP. (year 184) and $\frac{\Xi}{\Lambda}$ under the throne; *very rare, high relief, and fine condition, except a hole which does no injury to the type: size* $7\frac{1}{2}$. *weight* $253\frac{8}{10}$ *grs.* 1

2571 Another; same date; *in excellent condition, and very rare: size* $7\frac{1}{2}$. *weight* $254\frac{5}{10}$ *grs.* 1

COINS OF THE KINGS OF ÆGYPT, IN GOLD.

PENTADRACHMS OF PTOLEMY SOTER.

*** In displaying before the young Numismatist such a splendid suite of these most rare coins of Ptolemy Soter and his successors, we feel constrained to refer to the remark made at page 26 of the former portion of this Catalogue, the truth of which will have been abundantly perceived during the examination of the many rich suites of this princely cabinet.

It was the quantity and high condition of these precious coins, as well as of those which follow at page 381, which induced the writer to put into order some memoranda of old date, and to prepare the short paper on the Ægyptian or Ptolemaic Talent which was read to the Numismatic

Society, 25th April, 1844, and will be printed in the forthcoming number of the Numismatic Chronicle.

2573 Another; with a monogram like Σ., above a buckler, in the field to the left, and I. between the legs of the eagle; *as it came from the die, and of the same beauty and rarity: size* 6. *weight* $275\frac{1}{10}$ *grs.* 1

2574 Another; *in every respect the same: size* 6. *weight* $275\frac{3}{10}$ *grs.* 1

2575 Another; with the same monogram, but no buckler and no letter between the legs of the eagle; *in the same perfection, and of the same beauty and rarity: size* 6. *weight* $275\frac{7}{10}$ *grs.*

2576 Another; with the same monogram and buckler, and Φ. between the legs of the eagle; *in the same perfection, and extremely fine and rare: size* 6. *weight* $275\frac{2}{10}$ *grs.* 1

*** This lot and the following are evidently Becker's productions. ing on a buckler at her feet, and supporting a spear behind her, the whole in a wreath; in the field, under the little Victory, $\frac{IE}{\Theta}$; *in excellent condition, and probably unique; not in Mionnet:* *size* 8. *weight* 255 *grs.* 1

*** This coin, with the portrait and title of Antiochus VIII., exhibits for the first time the usual type of Antiochus VII. Euergetes (see lot 2656), and appears to be an unpublished variation in the type of Antiochus VIII.

2670 Antiochus VIII.; usual type; *Mt. Supp.* vol. 8, pl. 13, fig. 4; *rev.* Jupiter standing, with a crescent above his head, a star in his extended right hand, and a long sceptre in his left; a monogram in the field; *extremely fine:* *size* $8\frac{1}{2}$. *weight* $257\frac{7}{10}$ *grs.* 1

size 8. *weight* 245 *grs.* 1

size 7. *weight* $214\frac{3}{10}$ *grs.* 1

*** This coin was evidently struck by some town on the coast, under the influence of the Ptolemies, and offers the very remarkably peculiarity of the L. (Ανκαβαντος.) prefixed to the date, which is perhaps unique on a coin of a Syrian king.

2680 Seleucus VI.; *rev.* ΕΠΙΦΑΝΟΥΣ. ΝΙΚΑΤΟΡΟΣ., Minerva standing; in the field of the coin is a plant, and in front of the Minerva are the letters ΑΔΕΔΙΦ.; *extremely rare, and in very fine condition:* *size* 8. *wt.* $238\frac{7}{10}$ *grs.* 1

*** This singular coin is of base metal, or potin, and somewhat double struck, having the edge bevelled like the copper coinage of Ægypt. It is unlike the rest of the coins of the Seleucidæ in style of workmanship, and style of mintage, and the portrait appears not to resemble any known Antiochus, yet it probably belongs to this series.

THE COINS PUBBISHED BY HARWOOD.

N.B. During the preliminary examinations of the cabinets of the late Mr. Thomas previous to commencing this Catalogue, the writer recognized several coins, which appeared to be the identical specimens engraved in the well known work of Mr. Harwood, entitled "Populorum et Urbium, selecta numismata Græca, ex ære," 4to. London, 1812, *with seven copper plates of the coins. This led to a further and closer examination, which ended in* the discovery of the whole of the coins engraved in the seven plates, except eight, *which it is probable never came into the possession of Mr. Thomas.*

As several of these coins published by Harwood are extremely curious and remarkable, and as others have, for many years, been a stumbling block to numismatists, the writer has availed himself of the present most favorable opportunity, to offer a few remarks on some of tne coins previous to the possible or probable dispersion of them.

2930 The two Coins forming the vignettes at page 15 and 16; and the eighteen coins forming plate 1, No. to 18, except one coin, No. which was not found. 19

*** On coin No. 3 it may be remarked, that the letters (as engraved) are not at all clear, and it requires cleaning and study to be classed with certainty.

Coin No. 5 is of Cleone, the K not having been perceived. The coin No. 6 is of Cius, in Bithynia, or uncertain. The coin No. 10 is of Elis, and reads FAAA. The coin No. 11 is

The coin No. 15 is of Elis, and reads FA. AP.

2932 The Coins forming plate 3, No. 1 to 18, except No. 3. 17

*** The coin No. 2 is of Thessaly, and the figure of Minerva mistaken for the prow of a vessel. No. 9 is a coin of the Locri Opuntii. Coin

No. 11 is not of the Island Eubœa, but probably of Eubœa in Sicily, and is a coin for study. Coin No. 12 is of Cephaloedium, in Sicily.

2933 The Coins forming plate 4, No. 1 to 20, except No. 1, which was probably a coin of Calacte in Sicily, and No. 13. 18

*** Coin No. 5 is of Larissa, in Thessaly. Coin No. 11 is of Messenia, in the Peloponesus. No. 18 is a coin of Corcyra.

1934 The whole of the Coins forming plate 5, No. 1 to 18. 18

*** The coin No. 1 is a coin of Pella, in Macedon. The very curious coin of Petra, *Marmaricæ*, No. 2, is to be compared with Mt. Supp vol. ix. p. 180, No. 1. The coin No. 3 is of the Island Pholegandrus. No. 9 is a coin of Parium, in Mysia. No. 17 is a coin of Athens.

2935 The Coins forming plate 6, except No. 6. 18

*** The coin No. 3 is a Sicilian coin, and the monogram by no means clear—probably it is a coin of Syracuse. The coin No. 6 is of Corresia, in Ceos Insula: the ϒ being a K, and the ⊖ an O. Coin No. 7 is of Pella, in Macedonia: the TIEI being ΠΕΛ. The coin No. 2, Supplement, is a coin of Athens. The coin No. 7, Supp. is of Sicyon in Achaia. Coin No. 8, Supp. is of Hispania, similar to that in Mionnet, page 1, No. 4.

*** The very rare and interesting coin No. 1 appears quite satisfactory. Coin No. 8 is of Colophon in Ionia. Coin No. 9 is unsatisfactory as engraved, and requires study. Coin No. 15, ill preserved and uncertain. No. 16 is uncertain, being one of those coins inscribed KETPIΠOPIOΣ. No. 18 is a coin of Paros Insula. No. 19 a coin of Andrus, the letters being ANΔPI. No. 24 is an uncertain coin for study.

PREFATORY REMARKS, AND INDEX,

TO THE

FIRST AND SECOND PORTIONS OF THE GREEK, ROMAN, AND MEDIÆVAL COINS AND MEDALS.

The compilation of this voluminous Catalogue having been completed, a few prefatory remarks, though unsanctioned by precedent, seem requisite on an occasion like the present. A departure from the usage, seems not only due to the memory of the lamented Individual whose collection is about to be disposed of, but also to the importance of the collection itself, as well as to the public which is about to reap the fruits of his labours and liberal taste. Considerations of private friendship must also be allowed to plead for the writer of these brief remarks, if he ventures a passing word (which he is sure will be responded to by many,) in grateful commendation of the feeling of patriotic munificence, which induced the late Mr. Thomas not only to follow up the study of Coins for so many years with such rare devotedness; but, with a public spirit, and liberality of sentiment, rarely equalled in modern times, to devise a means (apparently, well calculated and amply sufficient) of keeping together this splendid collection for the benefit of his successors in similar pursuits.

Circumstances, however, having thwarted the liberal-minded and munificent intention to which we have just alluded, it was felt that a carefully compiled catalogue became a desideratum, since it might be the means of preserving, in some degree, the

interest and usefulness of the Collection, after its dispersion. It must be admitted that among the many causes which tend to impede the advancement of numismatic study, and the spread of the knowledge and information dependent on this branch of archæology, perhaps nothing more effectually operates than the dispersion of large and valuable cabinets, like the present, without any sufficient record being kept of them, by means of which a correct notion may hereafter be obtained of their contents.

To obviate this evil, as far as was attainable within the limits of a mere sale catalogue, has been the object in view during the compilation of the following pages. It is only to be regretted, that the importance and number of the coins was found to be so great, as to preclude the possibility of doing more than has been done. In particular, some lithographed plates of all the monograms on the Greek coins was contemplated, and fully intended, but found impracticable within the period fixed upon: the number of Greek coins being above 3100, and the Roman and Mediæval coins and medals amounting to nearly 4400.

To complete the Catalogue of these numerous objects within the allotted space of time, the description of the Greek, and greek-imperial Coins (which form about the first half of each day's sale) was confided to one, who, at first, wished his name to remain unknown, but who, in deference to the wish of many, will subscribe these prefatory remarks. The description of the Roman coins, in all the metals, together with the foreign Mediæval coins and medals of all kinds, (and which form the concluding half of each day's sale) has been made by Mr. Joseph Curt, of No. 65, Princes Street, Leicester Square; Medallist and Dealer in Coins: a gentleman whose name it would not be just to mention, without a distinct allusion to the zeal and ability with which his extended medallic knowledge has been applied on the present occasion, and which, it would be superfluous to add, is not confined to the

classes of coins which he has so ably described in this Catalogue, but, as matter of course, extends also to the Greek series.

These various collections exhibit the result of nearly fifty years' devoted attention to a favorite pursuit; — the late Mr. Thomas having evinced in very early life, that taste which continued throughout to characterize him,—but more especially for the last thirty-five years. During this long period, few coins of any merit in point of art, or rarity, were offered for public competition in London without exciting his attention. In the formation of this magnificent Collection, however, he was not by any means dependent on that fertile source, but was powerfully aided from private channels, which his celebrity and liberality kept constantly open.

Among the various treasures of this rich Cabinet, it would be endless to allude to particular coins, of which there exist so many unique and unpublished specimens in every class. We may, however, be permitted, amidst many precious gems belonging to cities of Greece, Asia, and Africa, to point at certain classes, or series of coins, which press themselves the most prominently upon our notice and recollection. Among these we would mention the noble collection of Syracusan Medallions; the rich Carthaginian series, in gold and silver; the surprising accumulation of Cyzicene Staters in gold; the beautiful series of Asiatic Electrum coins; the important regal series of the Kings of the Bosphorus, in gold and electrum; the interesting and numerous collection of silver coins of Lysimachus, and Alexander the great, as well as of the Kings of Macedon in general; the numerous and choice succession of silver coins of the Seleucidæ; and though last, not least, the splendid and matchless series of gold medallions of the Ptolemies, and their Queens.

Among the coins described by Mr. Curt, may be specially pointed out, the highly preserved and rare Collection of Roman Gold, ranging from the Consular times, through all the Em-

perors of Rome, down to the extinction of art under those of Byzantium. Of the foreign mediæval coins and medals in gold and silver, those of France stand pre-eminent for rarity and beauty. Such an assemblage of *Piedforts* (or "pièces de plaisir") was perhaps never before made. Among the modern medals, those of Hedlinger, Hamerani, Varin, &c. &c. are all fine. In conclusion, it may with safety be stated of this Collection,—which has been fitly characterized as "princely" by a very able numismatist,*—that, taken as a whole, no private collection hitherto formed, can be put in parallel with it.

It now only remains to state, that in compliance with a most honorable wish on the part of the Executors of the late Mr. Thomas, all false coins have been noticed, to the best of the judgment of the compilers. The scale of sizes uniformly referred to, is the same as that of Mionnet, and has been placed at the head of the first page of each of the two portions of the Greek and Roman Coins. Letters within brackets have been supplied in the legends, partly to assist in recognizing the individual coins during the sale, and partly to help the young numismatist as a purchaser. The arrangement of the Greek coins is in accordance with the geographical system of Eckhel, as adopted by Mionnet, in his most useful work entitled "*Description de Médailles Antiques*," *&c.*, 7 vols. 8vo., Paris, 1806-1813, and the 9 vols. of *Supplement*, 1819-1837. This work has been presumed to be in the hands of the reader, and is constantly referred to throughout, as *Mt.*, *Mionnet*, and *Mt. Supp.* Other works have been referred to as seldom as possible, and merely for the purpose of recording the types. When a reference to a page (p.) or to a plate (pl.) is made, with the word *see*, it is to be understood that the coin described, is identical with the coin referred to, *in every minute particular;* but

* See page XXI of the Introduction to a *Descriptive Catalogue of Roman Imperial Large-Brass Medals*, privately printed at Bedford, 4to., 1834, by Captain W. H. Smyth, R.N., &c. &c. &c.

when the word *compare* is used, it is to be understood that the type of the coin *merely approximates.* In all those references where neither the words *see* nor *compare* are used, it is to be understood that *the type is the same*, but that some monogram, or minute symbol, may occasionally differ. Sometimes this has been expressed, even more clearly, by the use of the word *type of No. — p. —*, which denotes that the coin *only resembles in the type*, and not in the accessories. The weights of the coins have been taken with the most scrupulous accuracy, and it is hoped that they may be found of use. An opportunity of weighing so many rare coins, in such an admirable state of preservation, can seldom or never recur, and data for a most interesting and neglected branch of numismatic study have, it is hoped, been thus preserved.

THOMAS BURGON,

Stoke Newington, July 1st, 1844.

P.S. The English Coins and Medals of this Collection, formed a portion apart, which was sold in February last, as *the first portion of the entire Collection.* The Catalogue of that portion, (having its separate Index,) was compiled with great care, by an esteemed and regretted individual, the late Mr. WILLIAM TILL, Medallist, and Dealer in Coins, of No. 17, Great Russell Street, Covent Garden.
